SUMMARY

Aspiring computer science engineer with a solid foundation in programming and problem-solving. Gained hands-on front-end experience through building websites using HTML, CSS, and JavaScript. Passionate about learning new technologies and eager to work on real-world projects. Strong communicator and team player, excited to grow and make an impact in the tech world.

ACADEMIC PROJECTS:

Student Management System

The Student Management System project provides a comprehensive introduction to C programming, file handling, and basic data management principles. It is an excellent project for beginners, offering a practical application for managing student records and enhancing coding proficiency. This project equips learners with essential skills and a solid foundation for further development in software engineering.

CERTIFICATIONS:

- Successfully completed the "C Programming For Beginners - Master the C Language" course on Udemy, gaining comprehensive proficiency in C programming fundamentals.
- Accomplished the "Introduction to Object-Oriented Programming in C++" course on Coursera, solidifying foundational knowledge in C++ programming paradigms.
- Successfully finished the "Computer Architecture: Digital Logic Circuits" course on Great Learning, acquiring comprehensive knowledge in digital logic circuits and computer architecture fundamentals.
- Completed the "Computer Architecture: Digital Components" course on Great Learning, acquiring a deep understanding of digital components and their role in computer architecture.

Declaration:

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibilities for the correctness of the above-mentioned details.
